EMPLOYMENT

Feb 2022 Position: Substitute Teaching Tutor

Where: University of Málaga

Present Brief description:

Teaching differential and integral calculus, vector calculus, differential equations and probability to undergraduate students in the University of Málaga's bachelor's degree in Chemistry. See the program of the current courses here and here.

Sept 2021 Position: Lead Data Scientist

— Where: Student Success

Apr 2022 Brief description:

Data science with data from Google Classroom. Analysis of engagement of students, STEM-HASS profile of students,

prediction of califications...

Feb 2021 Position: Postdoctoral Visiting Fellow

— Where: Basque Center for Applied Mathematics

Sept 2021 Brief description:

Harmonic Analysis and Differential Equations: New Challenges. In this project we studied multifractality and intermittency properties of certain stochastic processes coming from physics. We needed ideas from Harmonic Analysis, Number

Theory and Probability theory to study these topics

Sept 2016 Position: Predoctoral Researcher

— Where: Basque Center for Applied Mathematics

Dec 2020 Brief description:

During these years I studied different problems on Harmonic Analysis, from singular integral operators to Poincaré-Sobolev inequalities both in Euclidean and abstract metric spaces. This culminated in the development of a new method

to get Poincaré-Sobolev inequalities in different settings. This is collected in my thesis dissertation

EDUCATION

Sept 2016	Degree: PhD degree in Mathematics and Statistics
Dec 2020	Where: Basque Center for Applied Mathematics

Sept 2015 Degree: Master's degree in Mathematics and Statistics

Jul 2016 Where: Universities of Almería, Cádiz, Granada, Jaén and Málaga

Sept 2011 Degree: Bachelor's degree in Mathematics

Jul 2015 Where: University of Málaga
